

SEPA ENVIRONMENTAL CHECKLIST

UPDATED 2014

Purpose of checklist:

Governmental agencies use this checklist to help determine whether the environmental impacts of your proposal are significant. This information is also helpful to determine if available avoidance, minimization or compensatory mitigation measures will address the probable significant impacts or if an environmental impact statement will be prepared to further analyze the proposal.

Instructions for applicants: [\[help\]](#)

This environmental checklist asks you to describe some basic information about your proposal. Please answer each question accurately and carefully, to the best of your knowledge. You may need to consult with an agency specialist or private consultant for some questions. You may use "not applicable" or "does not apply" only when you can explain why it does not apply and not when the answer is unknown. You may also attach or incorporate by reference additional studies reports. Complete and accurate answers to these questions often avoid delays with the SEPA process as well as later in the decision-making process.

The checklist questions apply to all parts of your proposal, even if you plan to do them over a period of time or on different parcels of land. Attach any additional information that will help describe your proposal or its environmental effects. The agency to which you submit this checklist may ask you to explain your answers or provide additional information reasonably related to determining if there may be significant adverse impact.

Instructions for Lead Agencies:

Please adjust the format of this template as needed. Additional information may be necessary to evaluate the existing environment, all interrelated aspects of the proposal and an analysis of adverse impacts. The checklist is considered the first but not necessarily the only source of information needed to make an adequate threshold determination. Once a threshold determination is made, the lead agency is responsible for the completeness and accuracy of the checklist and other supporting documents.

Use of checklist for nonproject proposals: [\[help\]](#)

For nonproject proposals (such as ordinances, regulations, plans and programs), complete the applicable parts of sections A and B plus the [SUPPLEMENTAL SHEET FOR NONPROJECT ACTIONS \(part D\)](#). Please completely answer all questions that apply and note that the words "project," "applicant," and "property or site" should be read as "proposal," "proponent," and "affected geographic area," respectively. The lead agency may exclude (for non-projects) questions in Part B - Environmental Elements –that do not contribute meaningfully to the analysis of the proposal.

A. background [\[help\]](#)

1. Name of proposed project, if applicable: [\[help\]](#)

California Sea Lion Floating Traps at NAVSTA Everett and Bremerton

2. Name of applicant: [\[help\]](#)

Steven Jeffries, WDFW and Robert DeLong, NOAA, NMFS, AFSC, NMML

3. Address and phone number of applicant and contact person: [\[help\]](#)

Steven Jeffries, WDFW, 7801 Phillips Road SW, Lakewood WA 98498 (253) 380-4963

Robert DeLong, NOAA, NMFS, AFSC, National Marine Mammal Laboratory, 7600 Sand Point Way NE, Seattle WA 98115 (206) 526-4038

4. Date checklist prepared: [\[help\]](#)

July 20, 2014

5. Agency requesting checklist: [\[help\]](#)

WDFW

6. Proposed timing or schedule (including phasing, if applicable): [\[help\]](#)

As soon as possible, but no later than 15 August 2014

7. Do you have any plans for future additions, expansion, or further activity related to or connected with this proposal? If yes, explain. [\[help\]](#)

No.

8. List any environmental information you know about that has been prepared, or will be prepared, directly related to this proposal. [\[help\]](#)

None.

9. Do you know whether applications are pending for governmental approvals of other proposals directly affecting the property covered by your proposal? If yes, explain. [\[help\]](#)

None. NA

10. List any government approvals or permits that will be needed for your proposal, if known. [\[help\]](#)

USCOE-anchoring floats in marine waters.

USCG-flashing light permit-private Aids to Navigation

WDFW-HPA

11. Give brief, complete description of your proposal, including the proposed uses and the size of the project and site. There are several questions later in this checklist that ask you to describe certain aspects of your proposal. You do not need to repeat those answers on this page. (Lead agencies may modify this form to include additional specific information on project description.) [\[help\]](#)

WDFW and NMFS propose to install two 16'x16' floats that serve as hauling platforms for sea lions in Marine Waters of Puget Sound anchored in place adjacent to the Port Security Barriers at Navy Bases in Everett and Bremerton. Traps will be installed on the floats that will allow the agencies to capture up to 50 adult male California sea lions and 30 of those males will be instrumented with satellite linked dive recorders to assess the proportion of time animals are hauled out of the water and the location of their foraging (feeding) grounds within Puget Sound. The floats will be in place from spring/summer 2014 through April 2015. The project is being conducted to provide sea lion behavioral data for the US Navy required by them for permitting of their training and testing activities at-sea and in Puget Sound.

Sea lions use these floats as haulout sites, entering and exiting traps at will via a vertically-sliding door which will

be pad-locked open with a chain whenever capture events are not scheduled.

When used by sea lions and we are in an active capture mode, traps were unlocked and monitored hourly to be sure the doors remain open until staff chose to close them. Monitoring the traps uses a combination of physical visits by WDFW and NMFS to the trapping site 1) by boat, 2) monitoring from the shoreline, and 3) by Navy port security personnel. We plan 2-4 day capture windows between November and January at each location to deploy instruments. 15 sea lions will be instrumented at Everett and 15 instrumented at Bremerton.

Floats will be temporary and removed when project completed .

12. Location of the proposal. Give sufficient information for a person to understand the precise location of your proposed project, including a street address, if any, and section, township, and range, if known. If a proposal would occur over a range of area, provide the range or boundaries of the site(s). Provide a legal description, site plan, vicinity map, and topographic map, if reasonably available. While you should submit any plans required by the agency, you are not required to duplicate maps or detailed plans submitted with any permit applications related to this checklist. [\[help\]](#)

Float 1 (in Snohomish Co.) will be anchored ~60 yards outside of Naval Station Everett's Port Security Barrier at 47.9834 N; 122.225 W. Naval Station Everett is located next to the marina area of the city of Everett, WA, 25 miles (40 km) north of Seattle.

Float 2 (in Kitsap Co.) will be anchored ~30 yards outside Bremerton Naval Shipyard's Port Security Barrier at 47.5575N; 122.6284W. Bremerton Naval Shipyard is located in Bremerton, WA, 20 mi (34 km) west of Seattle.

See attached figures.

B. ENVIRONMENTAL ELEMENTS [\[help\]](#)

1. Earth

a. General description of the site [\[help\]](#)
(circle one): Flat, rolling, hilly, steep slopes, mountainous,
other _____
NA

b. What is the steepest slope on the site (approximate percent slope)? [\[help\]](#)
NA

c. What general types of soils are found on the site (for example, clay, sand, gravel, peat, muck)? If you know the classification of agricultural soils, specify them and note any agricultural land of long-term commercial significance and whether the proposal results in removing any of these soils. [\[help\]](#)
NA

d. Are there surface indications or history of unstable soils in the immediate vicinity? If so, describe. [\[help\]](#)
NA

e. Describe the purpose, type, total area, and approximate quantities and total affected area of any filling, excavation, and grading proposed. Indicate source of fill. [\[help\]](#)

NA

f. Could erosion occur as a result of clearing, construction, or use? If so, generally describe.

[\[help\]](#)

NA

g. About what percent of the site will be covered with impervious surfaces after project construction (for example, asphalt or buildings)? [\[help\]](#)

NA

h. Proposed measures to reduce or control erosion, or other impacts to the earth, if any: [\[help\]](#)

NA

2. Air

a. What types of emissions to the air would result from the proposal during construction, operation, and maintenance when the project is completed? If any, generally describe and give approximate quantities if known. [\[help\]](#)

NA

b. Are there any off-site sources of emissions or odor that may affect your proposal? If so, generally describe. [\[help\]](#)

NA

c. Proposed measures to reduce or control emissions or other impacts to air, if any: [\[help\]](#)

NA

3. Water

a. Surface Water: [\[help\]](#)

1) Is there any surface water body on or in the immediate vicinity of the site (including year-round and seasonal streams, saltwater, lakes, ponds, wetlands)? If yes, describe type and provide names. If appropriate, state what stream or river it flows into. [\[help\]](#)

No.

2) Will the project require any work over, in, or adjacent to (within 200 feet) the described waters? If yes, please describe and attach available plans. [\[help\]](#)

None.

3) Estimate the amount of fill and dredge material that would be placed in or removed from surface water or wetlands and indicate the area of the site that would be affected. Indicate the source of fill material. [\[help\]](#)

None.

4) Will the proposal require surface water withdrawals or diversions? Give general description, purpose, and approximate quantities if known. [\[help\]](#)

No.

5) Does the proposal lie within a 100-year floodplain? If so, note location on the site plan.

[\[help\]](#)

No.

6) Does the proposal involve any discharges of waste materials to surface waters? If so, describe the type of waste and anticipated volume of discharge. [\[help\]](#)

No.

b. Ground Water:

1) Will groundwater be withdrawn from a well for drinking water or other purposes? If so, give a general description of the well, proposed uses and approximate quantities withdrawn from the well. Will water be discharged to groundwater? Give general description, purpose, and approximate quantities if known. [\[help\]](#)

No.

2) Describe waste material that will be discharged into the ground from septic tanks or other sources, if any (for example: Domestic sewage; industrial, containing the following chemicals. . . ; agricultural; etc.). Describe the general size of the system, the number of such systems, the number of houses to be served (if applicable), or the number of animals or humans the system(s) are expected to serve. [\[help\]](#)

None.

c. Water runoff (including stormwater):

1) Describe the source of runoff (including storm water) and method of collection and disposal, if any (include quantities, if known). Where will this water flow? Will this water flow into other waters? If so, describe. [\[help\]](#)

None.

2) Could waste materials enter ground or surface waters? If so, generally describe. [\[help\]](#)

No.

3) Does the proposal alter or otherwise affect drainage patterns in the vicinity of the site? If so, describe.

No.

d. Proposed measures to reduce or control surface, ground, and runoff water, and drainage pattern impacts, if any:

NA

4. **Plants** [\[help\]](#)

a. Check the types of vegetation found on the site: [\[help\]](#)

____deciduous tree: alder, maple, aspen, other

____evergreen tree: fir, cedar, pine, other

____shrubs

____grass

____pasture

- ____ crop or grain
- ____ Orchards, vineyards or other permanent crops.
- ____ wet soil plants: cattail, buttercup, bullrush, skunk cabbage, other
- ____ water plants: water lily, eelgrass, milfoil, other
- ____ other types of vegetation

None. Everett has a bottom covered with bark and wood debris. Bremerton has a mud bottom. Floats will be in ~40 feet of water at MHW.

- b. What kind and amount of vegetation will be removed or altered? [\[help\]](#)

None.

- c. List threatened and endangered species known to be on or near the site. [\[help\]](#)

None.

- d. Proposed landscaping, use of native plants, or other measures to preserve or enhance vegetation on the site, if any: [\[help\]](#)

NA

- e. List all noxious weeds and invasive species known to be on or near the site.

None.

5. Animals

- a. List any birds and other animals which have been observed on or near the site or are known to be on or near the site. Examples include: [\[help\]](#)

birds: hawks, heron, gulls, bald eagles, songbirds

mammals: California sea lions, harbor seals

fish: a few sculpins, flounder and perch species

- b. List any threatened and endangered species known to be on or near the site. [\[help\]](#)

None.

- c. Is the site part of a migration route? If so, explain. [\[help\]](#)

No.

- d. Proposed measures to preserve or enhance wildlife, if any: [\[help\]](#)

NONE.

- e. List any invasive animal species known to be on or near the site.

None known.

6. Energy and natural resources

- a. What kinds of energy (electric, natural gas, oil, wood stove, solar) will be used to meet the completed project's energy needs? Describe whether it will be used for heating, manufacturing, etc. [\[help\]](#)

Solar powered navigation light on each trap per USCG regulations.

- b. Would your project affect the potential use of solar energy by adjacent properties?

If so, generally describe. [\[help\]](#)

No.

- c. What kinds of energy conservation features are included in the plans of this proposal?

List other proposed measures to reduce or control energy impacts, if any: [\[help\]](#)

Use of solar powered navigation lights

7. Environmental health

- a. Are there any environmental health hazards, including exposure to toxic chemicals, risk of fire and explosion, spill, or hazardous waste, that could occur as a result of this proposal?

If so, describe. [\[help\]](#)

No, none.

- 1) Describe any known or possible contamination at the site from present or past uses.
- 2) Describe existing hazardous chemicals/conditions that might affect project development and design. This includes underground hazardous liquid and gas transmission pipelines located within the project area and in the vicinity.
- 3) Describe any toxic or hazardous chemicals that might be stored, used, or produced during the project's development or construction, or at any time during the operating life of the project.
- 4) Describe special emergency services that might be required.
- 5) Proposed measures to reduce or control environmental health hazards, if any:

b. Noise

- 1) What types of noise exist in the area which may affect your project (for example: traffic, equipment, operation, other)? [\[help\]](#)

Navy's normal shipyard and pier activities to which sea lions are habituated.

- 2) What types and levels of noise would be created by or associated with the project on a short-term or a long-term basis (for example: traffic, construction, operation, other)? Indicate what hours noise would come from the site. [\[help\]](#)

Normal sea lion barking associated with sea lions already using the adjacent port security barriers for haulouts. Outboard engine noise during installation, captures and removal of floats.

- 3) Proposed measures to reduce or control noise impacts, if any: [\[help\]](#)

None.

8. Land and shoreline use

- a. What is the current use of the site and adjacent properties? Will the proposal affect current land uses on nearby or adjacent properties? If so, describe. [\[help\]](#)
Everett is a Navy homeport for USS Nimetz, support vessels and shoreside facilities. Bremerton is a Navy shipyard. Activities will not impact these facilities.
- b. Has the project site been used as working farmlands or working forest lands? If so, describe. How much agricultural or forest land of long-term commercial significance will be converted to other uses as a result of the proposal, if any? If resource lands have not been designated, how many acres in farmland or forest land tax status will be converted to nonfarm or nonforest use? [\[help\]](#)
No. NA.
- 1) Will the proposal affect or be affected by surrounding working farm or forest land normal business operations, such as oversize equipment access, the application of pesticides, tilling, and harvesting? If so, how:
NA.
- c. Describe any structures on the site. [\[help\]](#)
NA.
- d. Will any structures be demolished? If so, what? [\[help\]](#)
None.
- e. What is the current zoning classification of the site? [\[help\]](#)
NA.
- f. What is the current comprehensive plan designation of the site? [\[help\]](#)
NA.
- g. If applicable, what is the current shoreline master program designation of the site? [\[help\]](#)
NA.
- h. Has any part of the site been classified as a critical area by the city or county? If so, specify. [\[help\]](#)
- i. Approximately how many people would reside or work in the completed project? [\[help\]](#)
None.
- j. Approximately how many people would the completed project displace? [\[help\]](#)
None.
- k. Proposed measures to avoid or reduce displacement impacts, if any: [\[help\]](#)
NA.
- L. Proposed measures to ensure the proposal is compatible with existing and projected land uses and plans, if any: [\[help\]](#)
NA.
- m. Proposed measures to ensure the proposal is compatible with nearby agricultural and forest lands of long-term commercial significance, if any:
NA.

9. Housing

- a. Approximately how many units would be provided, if any? Indicate whether high, middle, or low-income housing. [\[help\]](#)
NA.
- b. Approximately how many units, if any, would be eliminated? Indicate whether high, middle, or low-income housing. [\[help\]](#)
NA.
- c. Proposed measures to reduce or control housing impacts, if any: [\[help\]](#)
NA.

10. Aesthetics

- a. What is the tallest height of any proposed structure(s), not including antennas; what is the principal exterior building material(s) proposed? [\[help\]](#)
Trap and floats are identical with 8' tall walls constructed of reinforced chain link fencing on a float that sits 26" above the water surface.
- b. What views in the immediate vicinity would be altered or obstructed? [\[help\]](#)
None.
- c. Proposed measures to reduce or control aesthetic impacts, if any: [\[help\]](#)
NA.

11. Light and glare

- a. What type of light or glare will the proposal produce? What time of day would it mainly occur? [\[help\]](#)
Single flashing navigation light on each float.
- b. Could light or glare from the finished project be a safety hazard or interfere with views? [\[help\]](#)
NA.
- c. What existing off-site sources of light or glare may affect your proposal? [\[help\]](#)
NA.
- d. Proposed measures to reduce or control light and glare impacts, if any: [\[help\]](#)
NA.

12. Recreation

- a. What designated and informal recreational opportunities are in the immediate vicinity? [\[help\]](#)
NA.
- b. Would the proposed project displace any existing recreational uses? If so, describe. [\[help\]](#)
NA.
- c. Proposed measures to reduce or control impacts on recreation, including recreation opportunities to be provided by the project or applicant, if any: [\[help\]](#)
NA.

13. Historic and cultural preservation

- a. Are there any buildings, structures, or sites, located on or near the site that are over 45 years old listed in or eligible for listing in national, state, or local preservation registers located on or near the site? If so, specifically describe. [\[help\]](#)
NA.
- b. Are there any landmarks, features, or other evidence of Indian or historic use or occupation? This may include human burials or old cemeteries. Are there any material evidence, artifacts, or areas of cultural importance on or near the site? Please list any professional studies conducted at the site to identify such resources. [\[help\]](#)
No.
- c. Describe the methods used to assess the potential impacts to cultural and historic resources on or near the project site. Examples include consultation with tribes and the department of archeology and historic preservation, archaeological surveys, historic maps, GIS data, etc. [\[help\]](#)
NA.
- d. Proposed measures to avoid, minimize, or compensate for loss, changes to, and disturbance to resources. Please include plans for the above and any permits that may be required.
NA.

14. Transportation

- a. Identify public streets and highways serving the site or affected geographic area and describe proposed access to the existing street system. Show on site plans, if any. [\[help\]](#)
NA.
- b. Is the site or affected geographic area currently served by public transit? If so, generally describe. If not, what is the approximate distance to the nearest transit stop? [\[help\]](#)
NA.
- c. How many additional parking spaces would the completed project or non-project proposal have? How many would the project or proposal eliminate? [\[help\]](#)
NA.
- d. Will the proposal require any new or improvements to existing roads, streets, pedestrian, bicycle or state transportation facilities, not including driveways? If so, generally describe (indicate whether public or private). [\[help\]](#)
No.
- e. Will the project or proposal use (or occur in the immediate vicinity of) water, rail, or air transportation? If so, generally describe. [\[help\]](#)
2-3 outboard powered boats to access floats for handling sea lions.
- f. How many vehicular trips per day would be generated by the completed project or proposal? If known, indicate when peak volumes would occur and what percentage of the volume would

be trucks (such as commercial and nonpassenger vehicles). What data or transportation models were used to make these estimates? [\[help\]](#)

NA.

- g. Will the proposal interfere with, affect or be affected by the movement of agricultural and forest products on roads or streets in the area? If so, generally describe.

No.

- h. Proposed measures to reduce or control transportation impacts, if any: [\[help\]](#)

NA.

15. Public services

- a. Would the project result in an increased need for public services (for example: fire protection, police protection, public transit, health care, schools, other)? If so, generally describe. [\[help\]](#)

No.

- b. Proposed measures to reduce or control direct impacts on public services, if any. [\[help\]](#)

No.

16. Utilities

- a. Circle utilities currently available at the site: [\[help\]](#)
electricity, natural gas, water, refuse service, telephone, sanitary sewer, septic system,
other _____

NA

- b. Describe the utilities that are proposed for the project, the utility providing the service, and the general construction activities on the site or in the immediate vicinity which might be needed. [\[help\]](#)

NA.

C. Signature [\[HELP\]](#)

The above answers are true and complete to the best of my knowledge. I understand that the lead agency is relying on them to make its decision.

Signature:  _____

Name of signee _____ Steven Jeffries _____

Position and Agency/Organization _____ WDFW, Research Scientist, Marine Mammals _____

Date Submitted: _____ 21 July 2014 _____
